

ARMED ASSAULT III

NIGHT VISION GOOGLE

VERSION 1.0.0

**BY
DSK RED**

What is the modification about ?

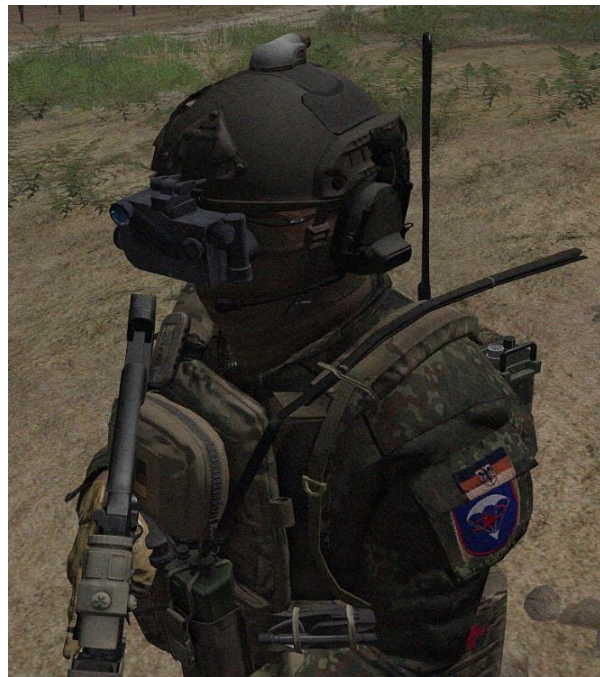

LUCIE is a binocular goggle based on a patented optical design offering a very compact head-mounted system, with a wide 51° field of view instead of the traditional 40° field of view. Thanks to its lightweight and compact/low profile design, LUCIE offers exceptional long wearing comfort. This modification contains the 3rd Generation tube and is fully supported by ACE.
